Experiment presentation by Wei-Lin Hsiao

Question: How much improvement can we get from instance-level comparison?

Attribute/Class	Athletic	Boots	Clogs	Flats	Heels	Pumps	Rain Boots	Sneakers	Stiletto	Wedding
Pointy at the front	2	6	3	5	10	9	4	1	8	7
Open	3	2	8	5	7	6	1	4	9	10
Bright in color	6	1	2	8	4	3	10	7	9	5
Covered w/ ornaments	4	9	6	5	8	7	1	3	10	2
Shiny	2	9	4	3	6	5	8	1	10	7
High at the heel	4	6	5	1	9	8	3	2	10	7
Long on the leg	7	9	2	3	6	5	10	8	4	1
Formal	3	6	4	7	9	8	1	2	5	10
Sporty	10	5	6	7	4	3	8	9	1	2
Feminine	1	6	4	5	10	9	3	2	8	7

Experiment setup

- Compare results using instance-level with using category-level on:
 - Image pair order accuracy
 - zero-shot learning accuracy

Image pair order accuracy

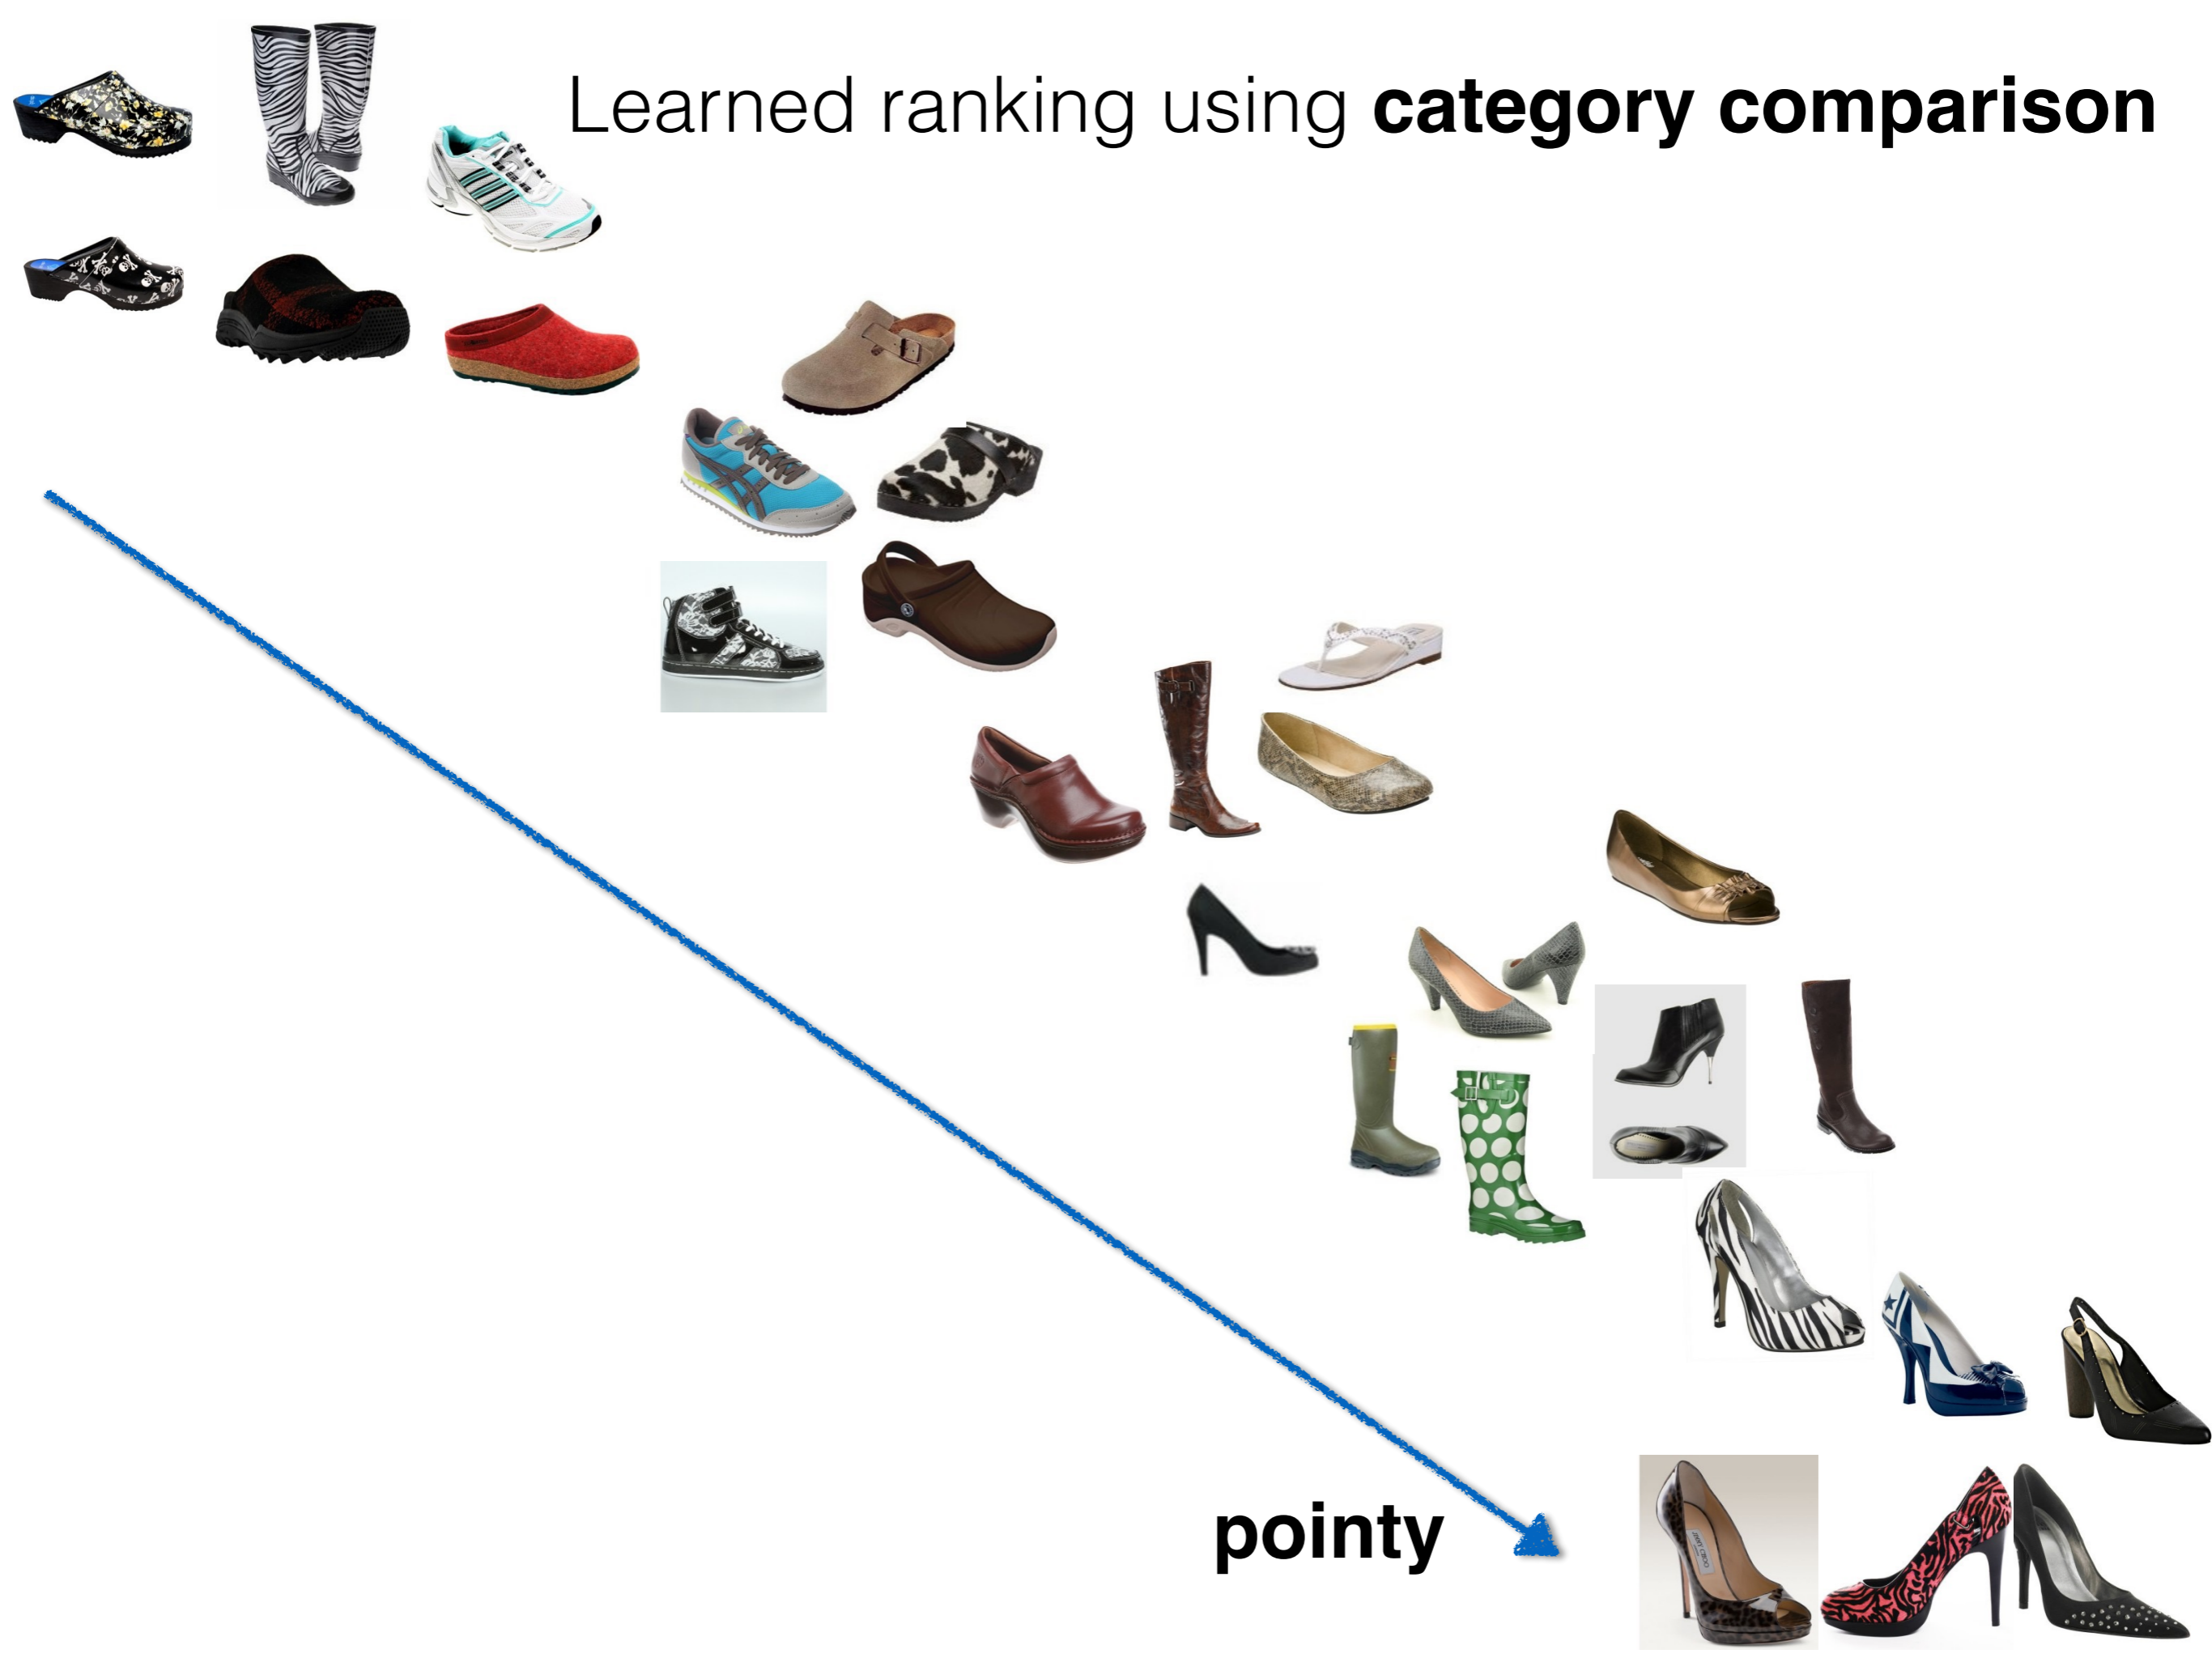

Learned ranking using instance comparison

pointy

Learned ranking using **category comparison**

Instance

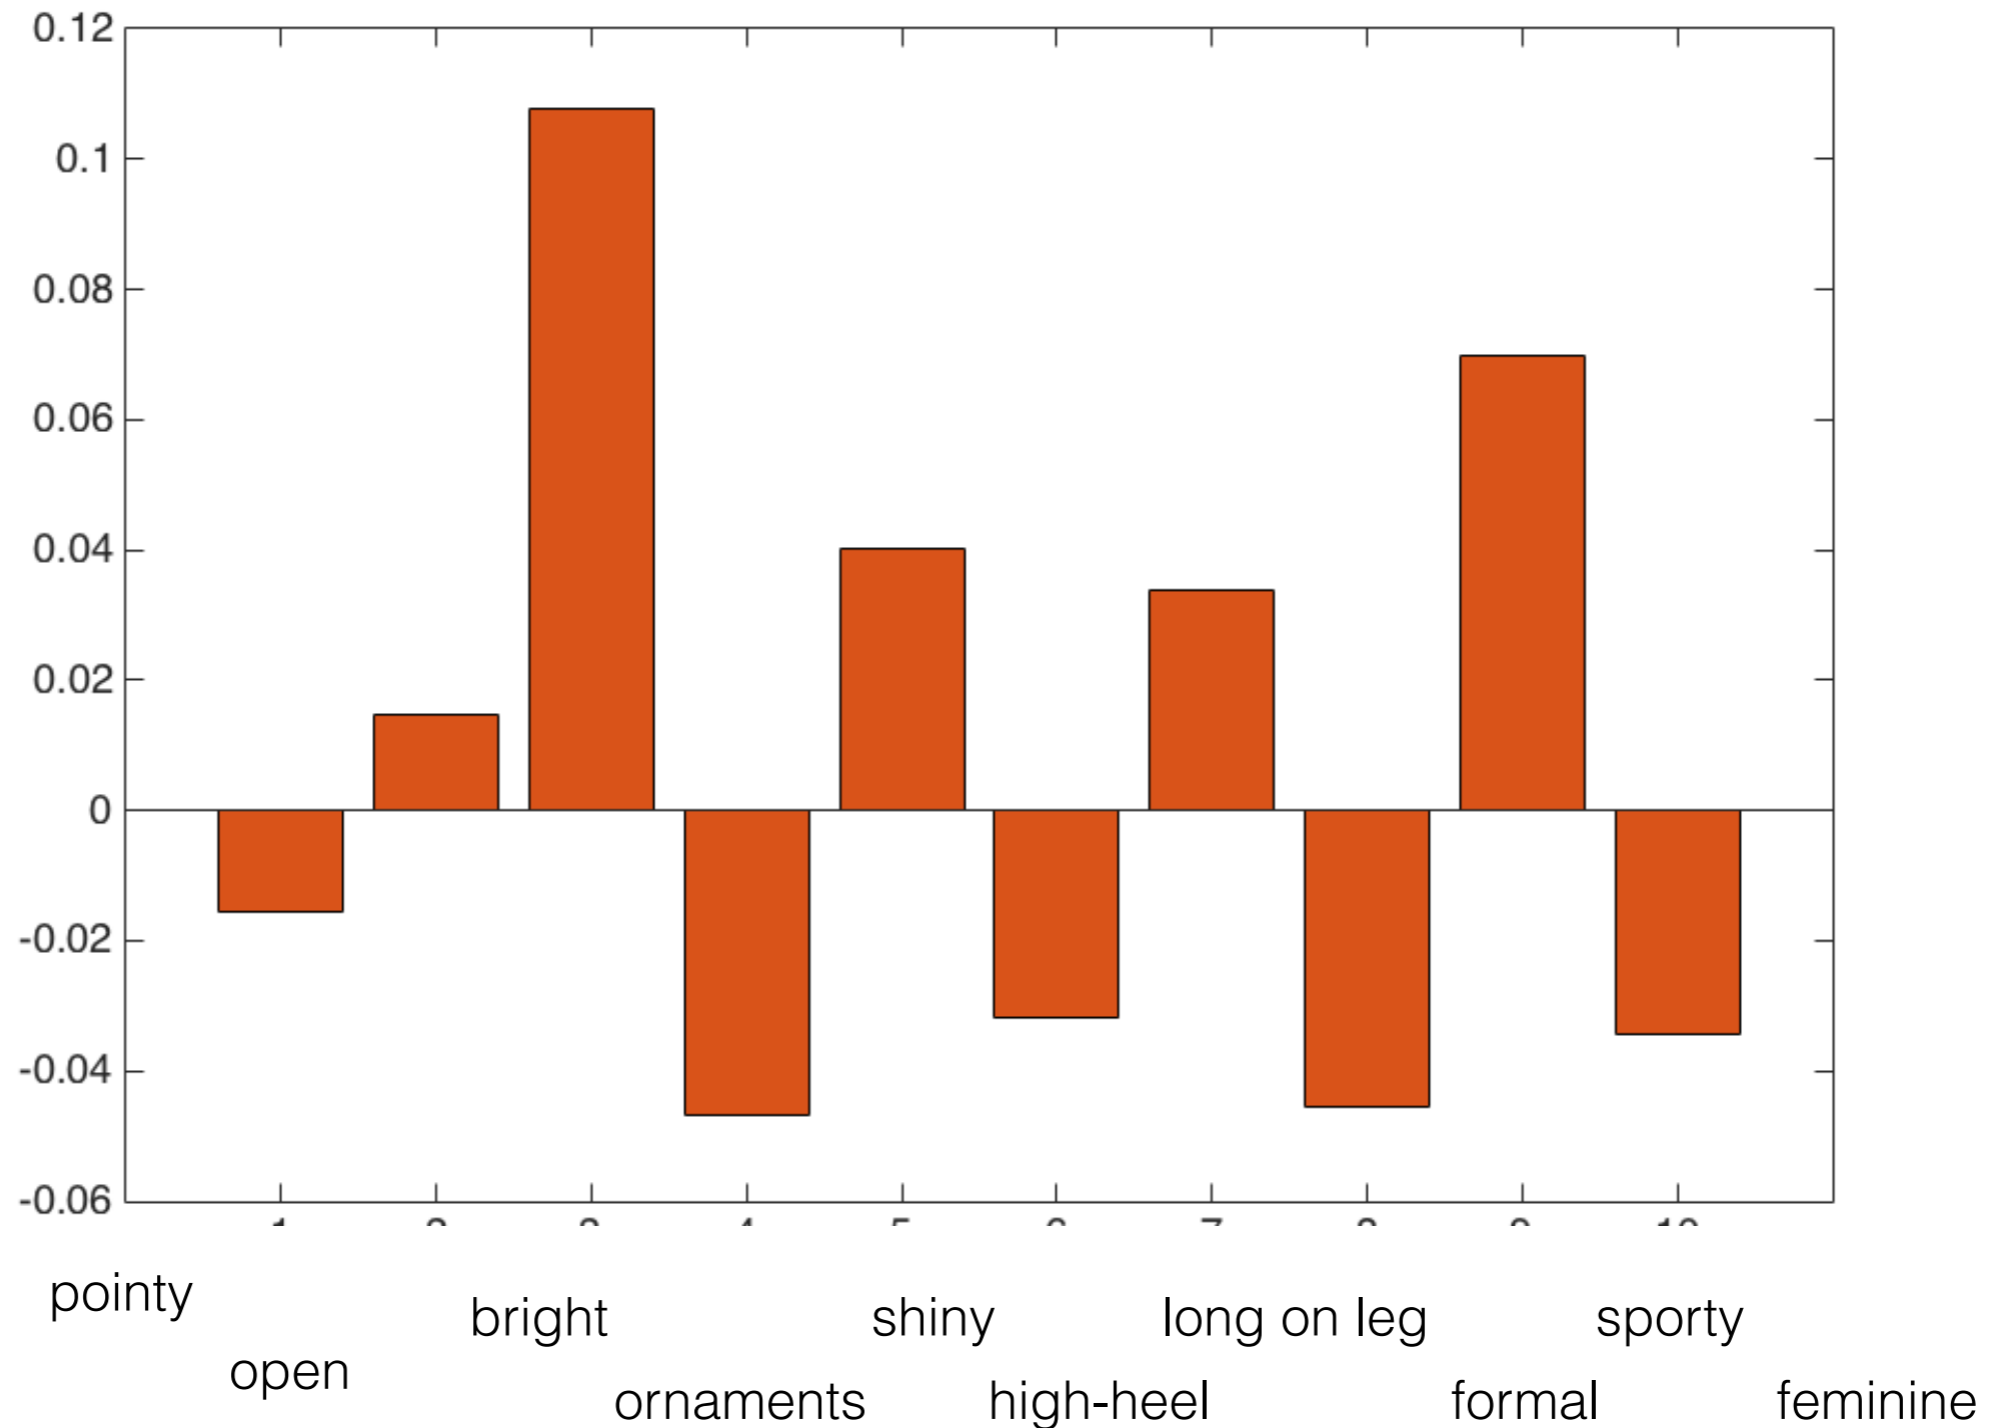

Category

pointy

Improvements made by instance comparison

Instance-level information helps most when there isn't a clear category ranking within an attribute

the proportion each category takes in the attribute

Bright

Sporty

Ornament

High-heels

categories

Zero-shot learning accuracy

Zero-shot classification

Guidance/Dataset	Shoes	OSR
Category	0.3423	0.5391
Instance	0.3826	<i>0.5409</i>

Classification on all seen categories

Guidance/Dataset	Shoes	OSR
Category	0.3665	0.6205
Instance	0.3825	0.6846

Category-level, prediction on all seen categories

true class

Classification results when all classes seen

category

instance

Guidance/Dataset	Shoes
Category	0.3665
Instance	0.3825

Unable to distinguish athletic/sneaker, boots/rainboots because category comparison too similar

Attribute/Class	Athletic	Boots	Clogs	Flats	Heels	Pumps	Rain Boots	Sneakers	Stiletto	Wedding
Pointy at the front	2	6	3	5	10	9	4	1	8	7
Open	3	2	8	5	7	8	1	4	9	10
Bright in color	6	1	2	8	4	3	10	7	9	5
Covered w/ ornaments	4	9	6	5	8	7	1	3	10	2
Shiny	2	9	4	3	6	5	8	1	10	7
High at the heel	4	6	5	1	9	8	3	2	10	7
Long on the leg	7	9	2	5	6	5	10	8	4	1
Formal	3	6	4	7	9	8	1	2	5	10
Sporty	10	5	6	7	4	3	8	9	1	2
Feminine	1	6	4	5	10	9	3	2	8	7

Classification results when **pumps, rain boots unseen**

category

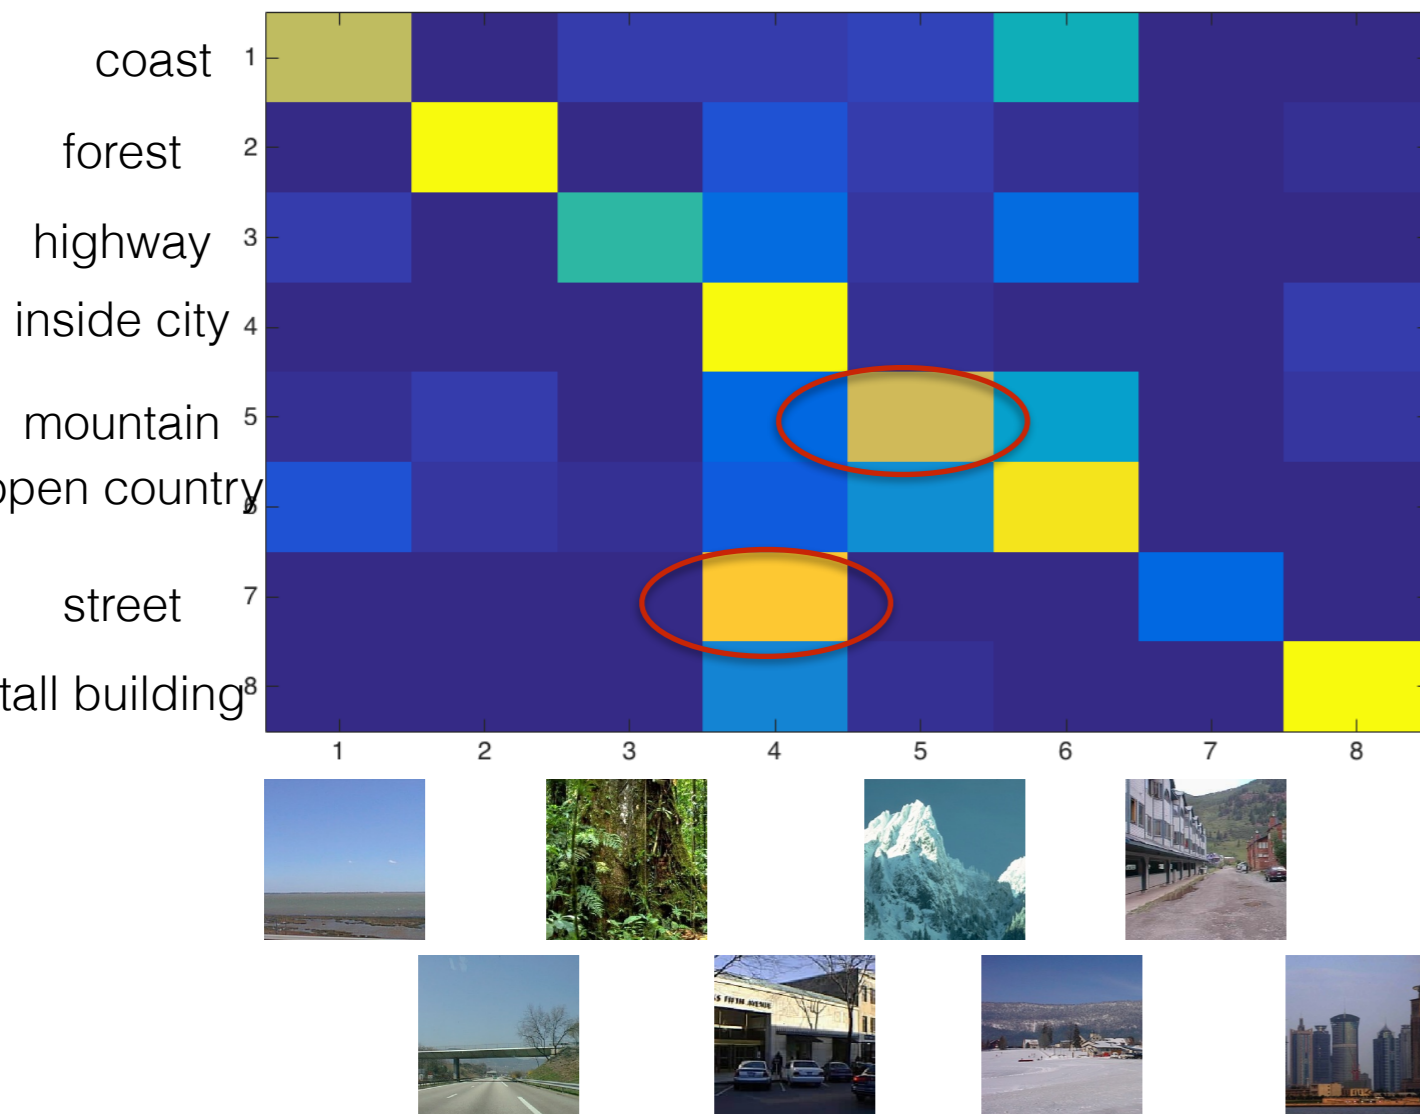

instance

Guidance/Dataset	Shoes
Category	0.3423
Instance	0.3826

Classification results when all categories seen

category

instance

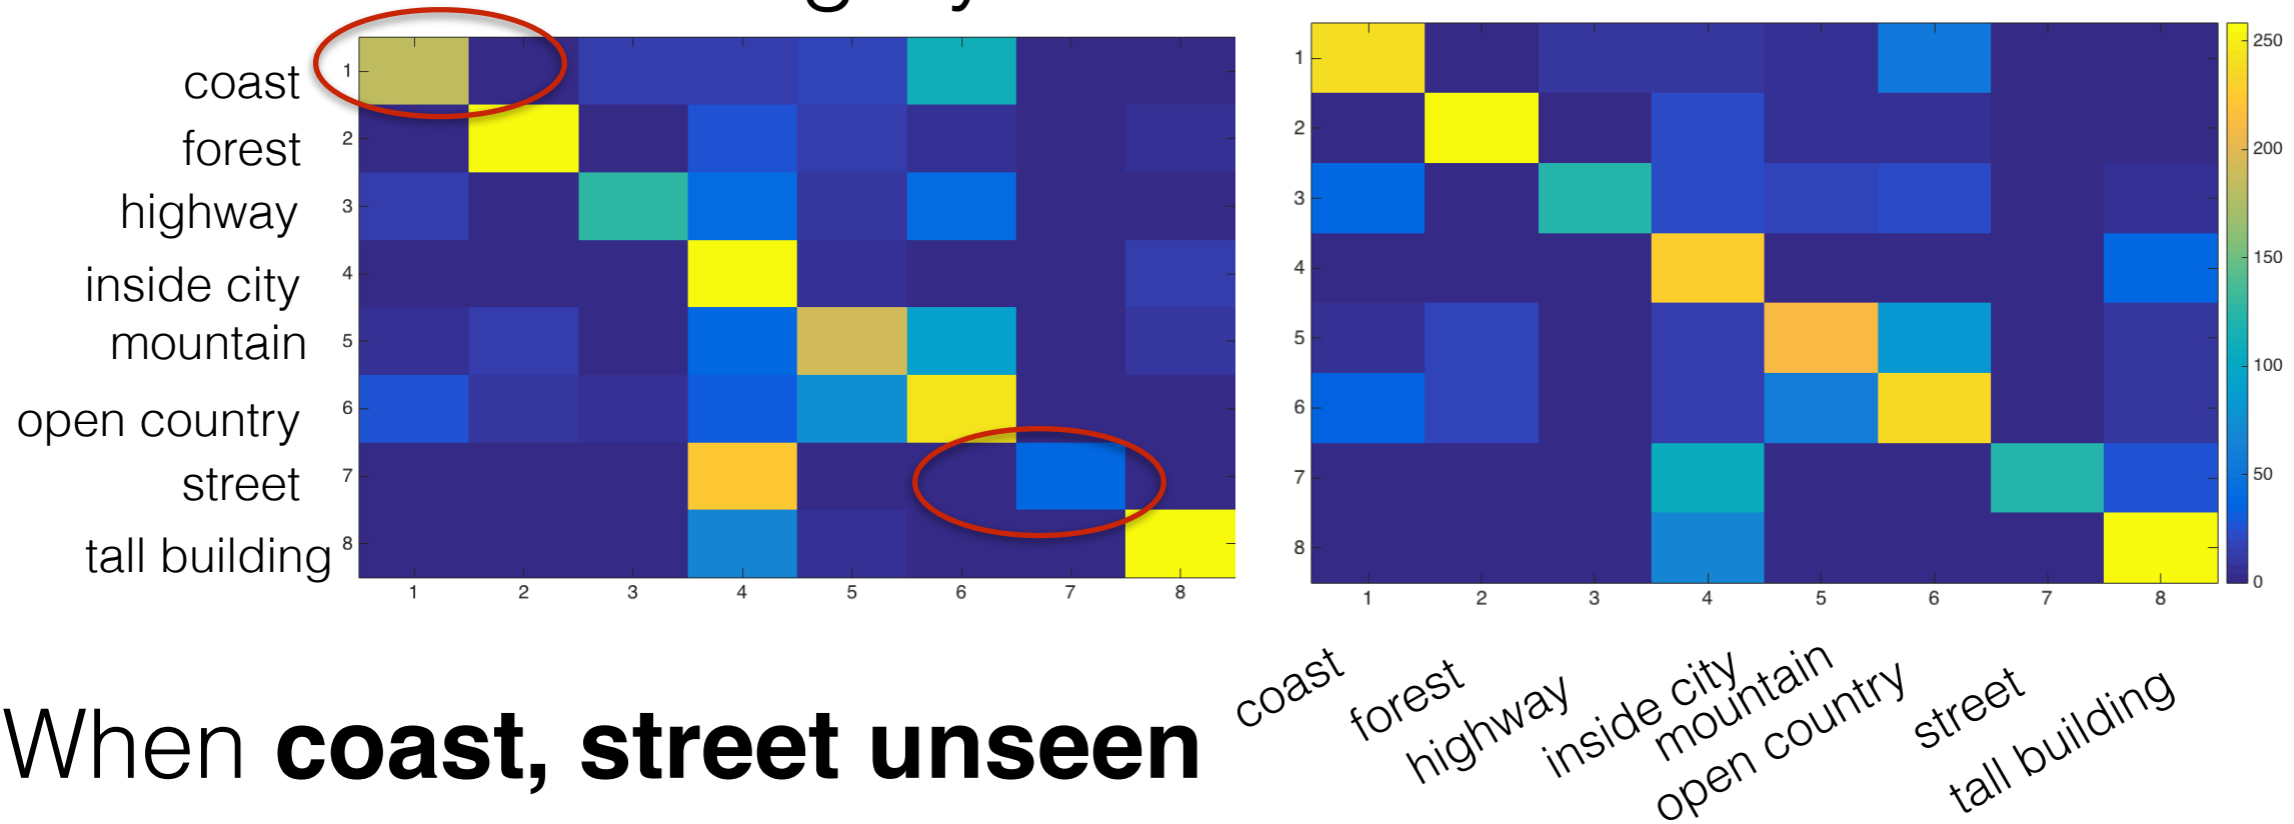

Guidance/Dataset	OSR
Category	0.6205
Instance	0.6846

Attribute/ Class	Coast	Forest	Highway	Inside City	Mountai n	Open country	Street	Tall building
Natural	1	1	5	6	1	1	6	8
Open	1	7	1	6	4	1	5	7
Perspective	7	5	4	3	6	8	2	1
Large objects	2	8	2	4	6	6	4	1
Diagonal plane	5	8	2	3	6	6	3	1
Close depth	8	1	1	1	7	6	1	5

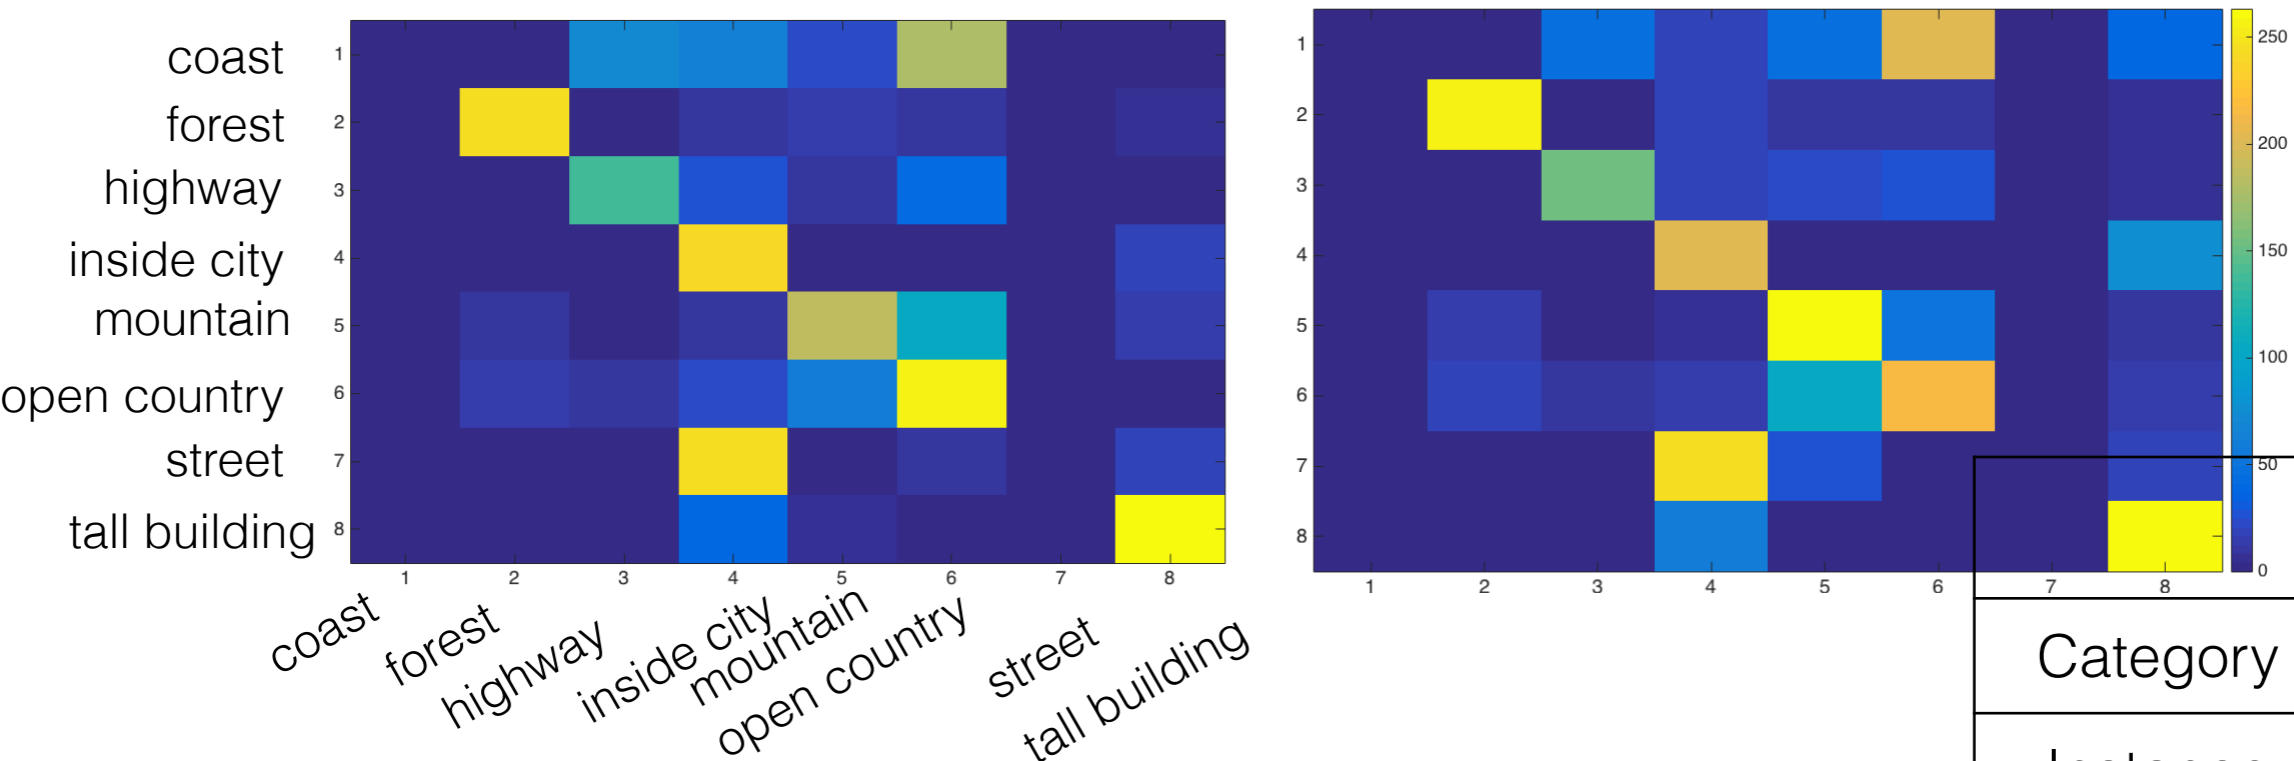

Classification results when all categories seen

category

instance

When **coast, street** unseen

	OSR
Category	0.5391
Instance	0.5409

category

instance

Conclusion

- Instance-level information in general helps classification between two very similar classes.
- Instance-level helps more when the classification task is more fine-grained.
